Matt,

Call Byron and see what he thinks; it's Merritt's site and they are out there together. He'll know better than I will - so as of next week I'll be onsite Monday. For now, I am hoping for a quiet few days remaining on response duty.

Sounds good. I just wanted to make sure you got it. Since you're at Stone Castle. ...looks like Duc and I will have some extra metals treatment product when we are done near Grand Junction. It is Free Flow 200 and comes in 1 cy sacks. Not sure how much we'll have left, but we have to ship it somewhere when we're done, so if you want it let me or Duc know.

Matt,

There will be some comments and specifications to be added to this write up. Generally the approach is consistent with what we discussed, but some of the finish details are absent. In addition, there is the grade adjustment to the top of the dump and new drainage channel that will need to be made as the portal / adit opening is dropped to the floor of the adit.

So, I will get something sometime next week as best I can while I am in UT covering the Stone Castle job.
